

Network Support & Administration & LGEdge

Network Administration

- Maintain & monitor your network to ensure minimum down time.
- Help you keep up-to-date with anti-virus, anti-spyware, and anti-spam software.
- Add or remove users from your network and/or e-mail.
- Evaluate and advise for future growth and upgrading your office.

Bridging the Gap...

Local Government Corporation is bridging the gap between hardware and software bringing you one step closer to a one source office technology partner.

Network Security

- Firewall Protection-LGEdge is an enterprise class firewall. In essence, it keeps the bad guys out & the good guys in. The LGEdge provides a secure internet connection with intrusion detection.
- Content Management- LGEdge can block internet sites you don't want your employees accessing as well as sites that contain harmful content.
- Proxy Server-LGEdge has a proxy server built in that will make your internet connection seem faster, as well as provide administrators with a way to track internet usage.

E-Mail Management

- E-mail personalized to your organization
- Spam Filtering
- E-mail virus scanning
- Shared calendars
- Shared documents
- Retention policy enforcement (auditors recommend an e-mail retention policy)
- Access from anywhere with the same interface as at your desk
